Objective

Enthusiastic and detail-oriented developer with strong foundation on computing and development projects. Eager to apply my technical skills, problem solving abilities and characteristic traits for learning and contributing to the success of a dynamic organization. Active learner and always eager to learn new things to be a better version of myself in both technical and characteristic aspects.

Experience

[Frontend Developer Intern \(September, 2024 – November, 2024\)](#)

Blue Fox Pvt Ltd

Developed responsive and visually appealing web components using ReactJs and Tailwind, ensuring cross-browser compatibility and adherence to coding best practices.

Collaborated with team members in a fast paced environment to integrate design mockups into functional UI elements.

Full Stack Developer Intern (December, 2024 – March, 2025)

Akshamala Infotech

Implemented dynamic user interfaces within the MERN stack, focusing on responsive design and performance optimization.

Coordinated with team members develop projects and ensure seamless functionality across devices.

Full Stack Developer Trainee (November, 2025 – Present)

Cellapp

Co-ordinating with team members to implement dynamic user interfaces and smooth backend development.

Educational Background

BSc (Hons) Computing 2022-2025

Islington College
London Metropolitan University
Kamalmarg, Kamalpokhari, Kathmandu

SLC

Kathmandu Model College (KMC)
National Examination Board
Bagbazar, Kathmandu

2022

SEE

2020

Niharika Shishu Kunja High School
National Examination Board
Machhapokhari, Kathmandu

Skills

Technical Skills

- Web Development: React, NodeJS, JavaScript, TypeScript, .Net, HTML, CSS
- Programming Languages: JavaScript, C#, Java, Python

Soft Skills

- Communication Skills
- Analytical Skill
- Time Management

- Database: SQL, MongoDB, PostGre, Oracle
- Application / Tools: VS Code, Visual Studio, Figma, GitHub, IntelliJ
- Operating System: Windows, Mac, Linux
- Problem Solving Skill
- Adaptability
- Attention to Details
- Teamwork

Projects

cozyCrochet

- Complete full stack e-commerce website using MERN stack with common and unique features.
- Aim to improve knowledge of full stack development using MERN stack and to build a full working web application.

Inkspire

- A complete website for a library/book online store using .Net C#, React and PostgreSQL.
- Aim to improve on web development using .Net framework and PostgreSQL.

Pocket Map

- Desktop application using .Net and SQLite for budget/finance management.
- Aim to gain knowledge of .Net and database used in the stack to develop desktop application.

AI System

- Basic product recommendation AI system created by training three different algorithms.
- Aim of understanding different kinds of data, collecting, analyzing, cleaning the data and training the AI model to give desired output.

Pixel Store

- An e-commerce website using Java programming language for electronics and gadgets following the MVC pattern.

- Developed with the aim of gaining experience on building websites based on real life scenarios and working in a team to carry out operations within a certain time period.

Student Registration System including GUI

- A basic student registration and management system using Java programming language with no database system.
- Developed with the aim of implementing a real-world problem scenario using the Object-oriented concept of Java and making a graphical user interface (GUI) for the system.

Management and Billing System

- A system based on the scenario of an event equipment rental shop to maintain information of the equipment, rent fees and billing system for the transactions.
- Use of python with the aim of being familiar with developing basic system for real life scenarios using python.

Database System in SQL

- Built a basic database in SQL containing different elements and database querying for getting different required results.

System Development Plans and Project Management

- Aim of demonstrating practical knowledge of 'Structured Software Engineering', working successfully in a team at given time scale.

Data Analysis

- Aim of applying programming knowledge and skills to data analysis tasks, demonstrating the skills for problem-solving and critical thinking/evaluation using python.

Budget Tracker

- A budget tracking app built using React, JavaScript.
- Aim of gaining knowledge of concept of react-router-dom, libraries and being familiar with development using react.

Static Website

- A static e-commerce website selling camera equipment using HTML, CSS and basic JavaScript.

- Simple and enhanced user interface designs and responsiveness.

Training and Certifications

- UI/UX workshop – IT Training Nepal
- SEO Foundations – LinkedIn Learning
- AWS Academy Graduate - AWS Academy Cloud Foundations
- AWS Academy Graduate - AWS Academy Data Engineering
- AWS Academy Graduate - AWS Academy Machine Learning Foundations
- AWS Academy Graduate - AWS Academy Machine Learning for Natural Language Processing
- Digital Marketing Foundations – LinkedIn Learning
- Marketing Foundations – LinkedIn Learning
